About Me

I am a full stack web developer with a strong desire to learn and grow. As a fresher, I am passionate about exploring new technologies and pushing the boundaries of what is possible with web development. My ultimate goal is to work with a company that encourages my professional growth in technologies. I am dedicated to staying up-to-date with the latest advancements in my field and enjoy attending tech Seminars, and contributing to open-source projects in my free time.

Projects

• E-commerce-website ---

In this project, I have developed a dynamic website with all features that an e-commerce website have like admin panel, user panel, product purchase, product categories, filters, payment gateway and more.

• AI image generator website ---

This website generates images by entering a prompt. In this project I had used DALL-E api to fetch AI generated images.

Certificates

• Innoviz technical Project competition 2023 (2nd rank)

• Pitch business idea (1st rank)

• Udemy course completion ---

MERN Stack

Git & Git Extensions

• Scaler masterclass participation---

React

Node.js

Exprsess.js
